

GL 7016 GLOBAL AQUA FLOCK BASE

THE GLOBAL
TEXTILE CHEMICALS

Global Aqua Flock Base provides excellent adhesion to most flock fibers, resulting in a very soft and flexible flock print. It was developed to ensure strong flock adhesion while curing into a soft, elastic print, making it one of the best flock adhesives available on the market today. When printed on a substrate, it significantly enhances wash fastness, ensuring durability and long-lasting performance. Aqua Flock Base is a PVC-free and phthalate-free acrylic base polymer, making it an eco-friendly and safe choice for textile applications.

This adhesive is specifically designed for flock fibres to be applied to woven textiles using electrostatic procedures. Its unique formulation allows for superior bonding between the fibres and the fabric, ensuring a high-quality finish. For optimal results, the product must be printed onto the fabric while it is still wet. Immediately after printing, flock fibres should be applied to achieve a uniform and durable flocked surface.

By using Aqua Flock Base, manufacturers can achieve excellent adhesion, improved wash resistance, and a soft, flexible print that enhances both the visual and tactile appeal of flocked textiles.

IDEAL FABRIC

100 % cotton or polyester blends

STORAGE

In cool dry and properly closed
(18°C to 35°C)

ADDITIVES

3 % AquaFix additives for small dryers

CLEAN UP

Wash off screen using water and mild detergent

CURING

160°C for 3 minutes

MESH

80 to 120 +/-in
monofilament recommended

APPLICATION

Mix fixer with Global Flock Base
before printing if needed

SQUEEGEE & STENCIL

Any direct Water solvent resistant
emulsion or capillary film
