

## GLOBAL AQUA FLUORESCENT COLOURS

THE GLOBAL  
TEXTILE CHEMICALS

GLOBAL AQUA FLUORESCENT COLOURS is a premium product from the water-based GLOBAL AQUA SERIES of textile screen printing inks. It is formulated using a PVC and Phthalate-free acrylic polymer, making it an environmentally friendly option for modern printing needs. This ink offers excellent storage stability and is highly effective for wet-on-wet printing applications. It is known for its user-friendly nature and superior soft handle, ensuring comfort and ease during use. Cleaning is simple as it can be easily washed off with water, adding to its convenience. With excellent stretchability and strong washing resistance, it ensures long-lasting prints. The ink also delivers a high glow finish, making designs more vibrant and eye-catching. If necessary, a small amount of reducer can be added to adjust the color concentration. For curing, apply one layer of the recommended mixed ink to the fabric and heat it at 160°C for three minutes. The product has a shelf life of one year from the date of manufacture. It should be stored in a cool and dry place, ideally between 18°C and 35°C (65°F - 95°F). Always keep the container tightly closed to prevent drying, humidity exposure, and contamination.

- GL 6028 GLOBAL AQUA FL PINK
- GL 6031 GLOBAL AQUA FL MAGENTA
- GL 6032 GLOBAL AQUA FL YELLOW
- GL 6035 GLOBAL AQUA FL GREEN
- GL 6036 GLOBAL AQUA FL VIOLET
- GL 6037 GLOBAL AQUA FL ORANGE
- GL 6038 GLOBAL AQUA FL BLUE
- GL 6039 GLOBAL AQUA FL RED

#### IDEAL FABRIC

100 % cotton or polyester blends

#### STORAGE

In cool dry and properly closed  
(18°C to 32°C)

#### ADDITIVES

5 % AquaFix additives for  
small dryers

#### CLEAN UP

Wash off screen using water and  
mild detergent

#### CURING

160°C for 3 minutes

#### MESH

60-230 +/-in  
monofilament recommended

#### APPLICATION

Use directly from the container  
without any modification

#### SQUEEGEE & STENCIL

Water resistant emulsion  
65-70 Duro meter, sharp edge
