

# GLOBAL PREMIUM SOFT WHITE

Global Premium Soft White is a high-quality, water-based ink from the Global Aqua Series, specifically designed for textile screen printing. The ink contains concentrated additives that help retain fluidity for extended periods, preventing premature drying. This feature allows for long production runs without interruptions due to screen clogging or ink thickening. Its formulation supports the use of high-count mesh screens, enabling precise and detailed prints. The ink's excellent printability ensures superior coverage while maintaining a soft hand feel on fabrics.

Global Premium Soft White is ideal for large-scale printing operations requiring speed and efficiency. It provides outstanding opacity, offering excellent hiding power on dark-colored cotton fabrics. This ensures that prints remain vibrant and bright, even on deep or heavily pigmented textiles. The ink adheres well to cotton and blended fabrics, ensuring durability and wash resistance. Its water-based composition is eco-friendly, free from PVC, phthalates, and other harmful chemicals. The formulation minimizes drying time while maximizing workability, making it user-friendly for printers. Proper curing enhances its longevity, preventing cracks or fading after multiple washes.

The ink delivers a smooth, soft-touch finish, ensuring comfort in printed garments. It is suitable for both manual and automatic screen printing setups, providing versatility in production. This product is highly efficient for high-volume printing without compromising on quality. It maintains excellent stability on screens, reducing downtime and improving overall productivity. By using Global Premium Soft White, textile printers can achieve crisp, high-quality prints with ease. With its advanced formulation, it is the perfect choice for achieving bright, durable, and soft textile prints.

#### IDEAL FABRIC

100 % cotton or polyester blends

#### STORAGE

In cool dry and properly closed  
(18°C to 32°C)

#### ADDITIVES

If require add Aqua Reducer  
maximum 3%

#### CLEAN UP

Wash off screen using water and  
mild detergent

#### CURING

160°C for 3 minutes

#### MESH

60-230 +/-in  
monofilament recomended

#### APPLICATION

Printing premium soft white should be  
used right from the container, without  
any modification stir well prior to use

#### SQUEEGEE & STENCIL

Solvent & Water resistant emulsion  
65-70 durometer sharp edge
