

GLOBAL AQUA DP 64

THE GLOBAL
TEXTILE CHEMICALS

Global Aqua DP 64 Dry Prevent is a specialized additive designed to extend the drying time of ink in the screen. It is formulated to prevent premature drying, ensuring smooth and uninterrupted printing. This additive is highly effective in maintaining ink fluidity during long printing sessions. It helps screen printers avoid issues such as clogging and ink buildup on the mesh. Global Aqua DP 64 is compatible with all Global Aqua water-based products. It seamlessly integrates with different inks, enhancing their workability and performance. Its formulation prevents ink from thickening, ensuring a consistent viscosity throughout the printing process. This results in cleaner and sharper prints without smudging or inconsistencies.

The additive is ideal for both manual and automatic screen printing applications. It enhances efficiency by reducing the need for frequent screen cleaning and ink replacement. Global Aqua DP 64 is easy to mix with inks, requiring only a small amount to achieve the desired effect. This makes it a cost-effective solution for professional printers. It is especially useful in hot and dry environments where water-based inks tend to dry too quickly. The additive ensures that inks remain workable for extended periods.

By improving ink performance, it helps achieve high-quality prints with better color distribution. This is crucial for maintaining vibrancy and detail in textile printing. The use of this additive minimizes downtime and material wastage. Printers can complete longer runs without worrying about ink drying up on the screen. Its compatibility with all Global Aqua products makes it a versatile addition to any printing setup. It works effectively with different ink formulations without altering their properties.

IDEAL FABRIC

100 % cotton or polyester blends

STORAGE

In cool dry and properly closed
(18°C to 32°C)

CLEAN UP

Wash off screen using water and
mild detergent

CURING

160°C for 3 minutes

SQUEEGEE & STENCIL

Water resistant emulsion
