

GLOBAL AQ FF FIX CL

Global AQ FF Fix CL is a unique formaldehyde-free cross linking agent designed to enhance the wash and rub fastness of textile prints. This advanced crosslinking agent strengthens the bond between ink and fabric, improving durability and resistance to repeated washing. It helps maintain the vibrancy of prints while preventing color fading or bleeding. Its easy-to-use formulation allows seamless integration into existing printing processes. It does not affect the texture or flexibility of the fabric, ensuring a comfortable feel even after multiple washes.

Global AQ FF Fix CL is an eco-friendly solution, free from harmful chemicals, making it suitable for sustainable textile printing. It enhances the overall performance of water-based inks without compromising the softness of the fabric. By increasing rub fastness, it prevents ink transfer or smudging, making it ideal for high-quality apparel, home textiles, and industrial applications. It provides excellent adhesion, ensuring long-lasting print integrity. This product is highly effective across various fabric types, including cotton, polyester blends, and synthetic materials. It works well with different screen printing techniques and drying methods.

It supports sustainable production practices in the textile industry. Its compatibility with water-based inks allows for smooth application without altering the ink's color or consistency. It enhances ink performance while maintaining the fabric's breathability. It is the preferred choice for manufacturers seeking compliance with OEKO-TEX and other global safety standards. Overall, this crosslinking agent ensures that textile prints remain vibrant, long-lasting, and eco-friendly. It is a reliable solution for achieving superior fastness in professional textile printing.

IDEAL FABRIC

100 % cotton or polyester blends

STORAGE

In cool dry and properly closed
(18°C to 32°C)

ADDITIVES

Not applicable

CLEAN UP

Wash off screen using water and mild detergent

CURING

160°C for 3 minutes

MESH

N/A, Determined by ink the additive mixed with

APPLICATION

Not applicable

SQUEEGEE & STENCIL

Determined by the ink additive mixed with
