

## GL 4219 GLOBAL AKRY SOL GLITTER BASE

THE GLOBAL  
TEXTILE CHEMICALS

Global Akrysol Glitter Base is a solvent based speciality textile printing medium formulated to carry and adhere glitter particles into fabric surfaces during screen printing. This adhesive is engineered with high-viscosity tacky composition that allows glitter flaks-ranging from fine to chunky graders to be evenly suspended and printed without settling or clumping. This gives designers the flexibility to create customized spackling effects resulting in vibrant, eye catching finish that enhances overall aesthetics of the printed fabric.

For optimal performance, it is crucial to select the right screen mesh according to the size of the glitter particles. A properly chosen mesh ensures even distribution, preventing clogging and ensuring smooth application. This helps achieve consistent and high-quality prints with maximum brilliance. It prevents shedding or fading, maintaining the intensity and clarity of the glitter design over time.

This product is easy to apply and can be used with manual and automated printing processes, making it suitable for both small-scale designers and large textile manufacturers. It offers excellent running properties, preventing buildup on printing equipment. It does not stiffen the material, making it ideal for fashionable and wearable designs. Global Akrysol Glitter Base is compatible with various textile materials, including cotton, polyester, blends, and leather, making it a versatile solution for different industries.

#### IDEAL FABRIC

100 % cotton or polyester blends

#### STORAGE

In cool dry and properly closed  
(18°C to 32°C)

#### ADDITIVES

If require add Akrysol Reducer

#### CLEAN UP

Any eco friendly solvents  
for screen wash

#### CURING

160°C for 3 minutes

#### MESH

20-80 t/in

#### APPLICATION

Glitter Flaks - 10 to 30 %  
Akrysol Glitter base -90 to 70 %

#### SQUEEGEE & STENCIL

60-75 Duro meter  
sharp edge
